This program aims to assist your technical staff and senior leadership in identifying areas of greatest cybersecurity risk to the organization. Unlike a traditional audit, our team works with you to understand your unique situation and perform a comprehensive assessment of the organization. This includes looking at IT infrastructure, policies, plans, and training needs. Our customizable services include:

- Network vulnerability discovery
- Process and controls review
- Physical security evaluation
- Social engineering testing
- Network penetration testing

AN ASSESSMENT FROM CRC WILL:

- MEASURE SECURITY POSTURE against industry and regulatory standards
- IDENTIFY TECHNICAL VULNERABILITIES and gaps in security, policy, and planning
- PROVIDE OPERATIONAL RECOMMENDATIONS for technical staff to address vulnerabilities
- PROVIDE STRATEGIC RECOMMENDATIONS for senior leadership to address policy and planning gaps
- PROVIDE GUIDANCE for future cybersecurity improvements and training

The threats don’t wait—Why should you? Contact us today!
