

Cybersecurity Awareness and Protection for K-12 Educators

2 HOUR LIVE ONLINE INSTRUCTOR-LED TRAINING FOR K-12 EDUCATORS

K-12 educators around the world are utilizing communication platforms to continue providing educational services and support for their students. This increased online usage has put our educators, their students and their workplace at risk of a cyber attack. In fact, a recent FBI report states that cyber crime has quadrupled since the onset of COVID-19. Therefore, this course has been created specifically to give educators and their students the knowledge to be safe online.

COURSE TOPICS

- Understanding cybersecurity and the impact to the education ecosystem.
- Identification and protection against cyber threats and attacks.
- Implementation of cyber hygiene in your teaching methods immediately.
- Resources to protect yourself and your students online.
